Bringing computational reproducibility to your research collaborations:
A hands-on workshop for researchers

Tuesday, May 21 | 10am - 12pm
University of Arizona
S215 in the ENR2 building

This is a step-by-step, practical workshop to prepare your research code and data for computationally reproducible publication.

Workshop goals:

- Learn best practices for file organization, documentation, automation, and dissemination.
- Assess possible tools for managing code and data.
- Build a collaborative workspace for your code and data on Code Ocean.

Refreshments will be provided.

Participants should bring their own code, data, and laptop.

Led by:
Xu Fei
Outreach Scientist
